Biotechnology and Bioengineering

Contents of Volume XXV, 1983

Issue No. 1, January

Symposium on Fuels and Chemicals from Biomass

Introduction
M. R. Ladisch, B. E. Dale, and G. T. Tsao 1

Modeling of Percolation Process in Hemicellulose Hydrolysis
D. R. Cahela, Y. Y. Lee, and R. P. Chambers 3

Pentosan Hydrolysis in a Concentrated Slurry System
J. A. Horwath, R. Mutharasan, and E. D. Grossmann 19

Structural Properties of Cellulose and Cellulase Reaction Mechanism
S. B. Lee, I. H. Kim, D. D. Y. Ryu, and H. Taguchi 33

Bioconversion of Waste Cellulose by Using an Attrition Bioreactor
S. K. Ryu and J. M. Lee 53

Selective Solvent Delignification for Fermentation Enhancement
G. C. Avgerinos and D. I. C. Wang 67

Conversion of Pentoses by Yeasts
C-S. Gong, T. A. Claypool, L. D. McCracken, C. M. Maun, P. P. Ueng, and G. T. Tsao 85

By-Product Inhibition Effects on Ethanolic Fermentation by *Saccharomyces cerevisiae*
B. Maiorella, H. W. Blanch, and C. R. Wilke 103

Recovery of Ethanol from Fermentation Broths Using Selective Sorption–Desorption
W. W. Pitt, Jr., G. L. Haag, and D. D. Lee 123

(*end of Symposium*)

Electrophoretic Study of the Macromolecular Compounds Excreted by Yeasts: Application to Differentiation Between Strains of the Same Species
M. Bouix and J. Y. Leveau 133

Effects of Mass-Transfer Resistance on Apparent Stability and Performance of Fixed-Bed Immobilized Enzyme Reactors: Theory and Experiments with Immobilized Invertase
H. Ooshima and Y. Harano 143

Structural Modification of Lignocellulosics by Pretreatments to Enhance Enzymatic Hydrolysis
M. M. Gharpuray, Y-H. Lee, and L. T. Fan 157

Reduction of Acetoin to 2,3-Butanediol in *Klebsiella pneumoniae:* A New Model
M. Voloch, M. R. Ladisch, V. M. Rodwell, and G. T. Tsao 173

Conversion of Straw–Manure Mixtures to Methane at Mesophilic and Thermophilic Temperatures
A. G. Hashimoto 185

Adsorption of Radium-226 by Biological Origin Absorbents
M. Tsezos and D. M. Keller 201

Immobilization of Fumarase by Entrapment of Rat Liver Mitochondria in Polyacrylamide Gel Using Gamma Rays
S. S. Godbole, R. Kaul, S. F. D'Souza, and G. B. Nadkarni 217

Growth Monitoring and Control Through Computer-Aided On-Line Mass Balancing in a Fed-Batch Penicillin Fermentation
D-G. Mou and C. L. Cooney 225

Growth Monitoring and Control in Complex Medium: A Case Study Employing Fed-Batch Penicillin Fermentation and Computer-Aided On-Line Mass Balancing
D-G. Mou and C. L. Cooney 257

Sorption of *Talaromyces emersonii* Cellulase on Cellulosic Substrates
A. Moloney and M. P. Coughlan 271

Continuous IBE Fermentation by Immobilized Growing *Clostridium beijerinckii* Cells in a Stirred-Tank Fermentor
P. G. Krouwel, W. J. Groot, and N. W. F. Kossen 281

Endogenous Metabolism and the Stability of Microbial Prey–Predator Systems
R. M. Nisbet, A. Cunningham, and W. S. C. Gurney 301

Communications to the Editor

Purification and Properties of Extracellular β-Glucosidase from *Scytalidium lignicola*
J. D. Desai, R. M. Ray, and N. P. Patel 307

Information for Contributors 315

Issue No. 2, February

Permeabilities of Composite Membranes Containing Phospholipids
E. Sada, S. Katoh, and M. Terashima 317

An Enzyme Electrode for Specific Determination of L-Lysine: A Real-Time Control Sensor
N. D. Tran, J. L. Romette, and D. Thomas 329

Production of *Spirulina* Biomass: Maintenance of Monoalgal Culture Outdoors
A. Vonshak, S. Boussiba, A. Abeliovich, and A. Richmond 341

Intensified Controlled Fish Growth in Tanks Implementing a Multipurpose Flow Device
G. Oron, G. Granoth, and D. Porath 351

Preparation and Performance of Immobilized Yeast Cells in Columns Containing No Inert Carrier
H-Y. Hsiao, L-C. Chiang, C-M. Yang, L-F. Chen, and G. T. Tsao 363

Pitfalls in the Assay of Carboxymethylcellulase Activity
W. A. Lindner, C. Dennison, G. V. Quicke 377

Isolation and Functional Characterization of Hydrocarbon Emulsifying and Solubilizing Factors Produced by a *Pseudomonas* Species
P. G. Reddy, H. D. Singh, M. G. Pathak, S. D. Bhagat, and J. N. Baruah 387

The Half-Saturation Coefficient for Dissolved Oxygen: A Dynamic Method for Its Determination and Its Effect on Dual Species Competition
O. J. Hao, M. G. Richard, D. Jenkins, and H. W. Blanch 403

Cultivation of *E. coli* in Single- and Ten-Stage Tower-Loop Reactors
I. Adler and K. Schügerl 417

Characterization of the Two-Phase Systems in Airlift Tower-Loop Bioreactors during the Cultivation of *E. coli*
J. Lippert, I. Adler, H. D. Meyer, A. Lübbert, K. Schügerl 437

Kinetics and Mechanism of Acyl Transfer by Penicillin Acylases
J. Konecny, A. Schneider, and M. Sieber 451

Factors Affecting Cell Attachment, Spreading, and Growth on Derivatized Microcarriers. I. Establishment of Working System and Effect of the Type of the Amino-Charged Groups
S. Reuveny, A. Mizrahi, M. Kotler, and A. Freeman 469

A Kinetic Model of Starch Hydrolysis by α- and β-Amylase during Mashing
A. Marc, J. M. Engasser, M. Moll, and R. Flayeux 481

Ethanol Fermentation with Cell Recycling: Computer Simulation
J. M. Lee, J. F. Pollard, and G. A. Coulman 497

Effects of Ammonia and Phosphate Limitation on the Activated Sludge Treatment of Calcium-Containing Chemical Waste
J. P. Salanitro, P. T. Sun, and J. B. Thornton 513

An Immobilized Two-Enzyme System (Fungal α-Amylase/Glucoamylase) and Its Use in the Continuous Production of High Conversion Maltose-Containing Corn Syrups
A. G. Hausser, B. S. Goldberg, and J. L. Mertens 525

Characterization of Cellobiose Fermentations to Ethanol by Yeasts
S. N. Freer and R. W. Detroy 541

Anodic Reactions in Microbial Fuel Cells
H. P. Bennetto, J. L. Stirling, K. Tanaka, and C. A. Vega 559

The Effects of Limiting Nutrients, Dilution Rate, Culture pH, and Temperature on the Yield Constant and Anthocyanin Accumulation of Carrot Cells Grown in Semicontinuous Chemostat Cultures
D. K. Dougall, S. LaBrake, and G. H. Whitten 569

Growth and Anthocyanin Accumulation Rates of Carrot Suspension Cultures Grown with Excess Nutrients After Semicontinuous Culture with Different Limiting Nutrients at Several Dilution Rates, pHs, and Temperatures
D. K. Dougall, S. LaBrake, and G. H. Whitten 581

Communications to the Editor

Egg Shell as a Carrier for Enzyme Immobilization
H. P. S. Makkar and O. P. Sharma 595

Preparation of Starch Beads as Support Material for Enzyme Immobilization
J. Kučera 599

Assay of Solid–Substrate Fermentation by Means of Reflectance Infrared Analysis
R. W. Silman, L. T. Black, and K. Norris 603

Evaluation of Organosolv Pulp as a Suitable Substrate for Rapid Enzymatic Hydrolysis
M. J. Neilson, F. Shafizadeh, S. Aziz, and K. V. Sarkanen 609

Preparation of Immobilized Invertase Using Poly(vinyl Alcohol) Membrane
K. Imai, T. Shiomi, K. Sato, and A. Fujishima 613

A Novel Reaction Bomb Sampling Device for Microparticulate Slurries
M. E. Himmel, K. Oh, M. Tucker, and J. Janssens 619

Temperature Effects During Polymerization of Polyacrylamide Gels Used for Bacterial Cell Immobilization
M. A. Wheatley and C. R. Phillips 623

Anaerobic Growth of *Alcaligenes faecalis* var. *denitrificans* at the Expense of Ether Glycols and Nonionic Detergents
M. A. Grant and W. J. Payne 627

Issue No. 3, March

Estimation of True Growth and Product Yields in Aerobic Cultures
M. D. Oner and L. E. Erickson 631

Production of Microbial Biomass on the Products of Mild Acid Hydrolysis of Piggery Slurry
G. Davey and J. Bruce 647

Continuous Simultaneous Saccharification and Fermentation of Starch Using *Zymomonas mobilis*
J. H. Lee, R. J. Pagan, and P. L. Rogers 659

Kinetics of Aflatoxin Biosynthesis by *Aspergillus parasiticus* in the presence of N^{α}-Palmitoyl-L-Lysyl-L-Lysine-Ethyl Ester Dihydrochloride or Dichlorvos
A. E. Yousef and E. H. Marth 671

New Concepts for Rapid Yeast Settling. I. Flocculation with an Inert Powder
M. G. Weeks, P. A. Munro, and P. L. Spedding 687

New Concepts for Rapid Yeast Settling. II. pH Switching with an Inert Powder
M. G. Weeks, P. A. Munro, and P. L. Spedding 699

Preparation and Properties of Trypsin Chemically Attached to EEDQ Activated Styrene–Methacrylic Acid Copolymers
A. Telefoncu 713

The Performance of Immobilized Glucose Isomerase Supported by Shrimp Chitin in Various Types of Reactors
F-S. Chen, H-S. Weng, and C-L. Lai 725

Kinetic and Thermal Characteristics of Enzyme-Graft Copolymers
P. Cremonesi and L. D'Angiuro 735

The Use of the Inverted Linear Model of Enzyme Decay to Plan a Strategy for Enzymatic Batch Reactions and to Assess the Industrial Applicability of Immobilized Enzyme Preparations
J. P. Cardoso and M. C. Costa 745

The Use of Chaotropic Salts for Separation of Ribonucleic Acids and Proteins from Yeast Nucleoproteins
S. Damodaran and J. E. Kinsella 761

Fermentation Monitoring by Polymeric-Resin-Based Microbial Assay
J. J. Seaton and H. Y. Wang 771

Computer Control of the Penicillin Fermentation Using the Filtration Probe in Conjunction with a Structured Process Model
E. Nestaas and D. I. C. Wang 781

Conversion of Cheese Whey to Single-Cell Protein
E. K. Sandhu and M. K. Waraich 797

Some Practical Aspects of Computer Applications in a Fermentor Hall
M. Meiners and W. Rapmundt 809

Determination of Substrate Concentrations by a Computerized Enzyme Electrode
J. P. Kernevez, L. Konate, and J. L. Romette 845

Communications to the Editor

Response of Composition in Biological Reactors to Changes in Inlet Concentration
D. W. Sundstrom, H. E. Klei, and J. Quinlan 857

Isolation and Propagation of New Methanol-Utilizing Microorganisms
A. S. El Nawawy and S. O. Gnan 863

Effect of Reagents for Polyacrylamide Gel Formation on β-D-Galactosidase
H. P. S. Makkar, O. P. Sharma, and R. K. Dawra 867

Solid-State Fermentation for Cellulase Production by *Pestalotiopsis versicolor*
M. N. A. Rao, B. M. Mithal, R. N. Thakkur, and K. S. M. Sastry 869

Determination of Kinetic Coefficients for an Acetate Enrichment Culture by the Infinite Dilution Technique
R. Hergenroeder and G. F. Parkin 873

High Productivity and Good Nutritive Values of Cellulolytic Bacteria Grown on Sugarcane Bagasse
A. Enriquez and H. Rodriguez 877

Prostaglandin Synthesis from Arachidonic Acid by Immobilized Ram Seminal Microsomes
T. J. Ahern, S. Katah, and E. Sada 881

Bactericidal Effect of Hen Egg White Support: A Step Towards the Use of Self-Sterilizing Enzyme Supports
R. Kaul, S. F. D'Souza, and G. B. Nadkarni 887

Issue No. 4, April

The Deposition of Bacterial Cells from Laminar Flows onto Solid Surfaces
M. S. Powell and N. K. H. Slater 891

Particle Size Reduction by Breakage in Biological Wastewater Treatment
L. A. Glasgow, R. J. Pollock, and W. A. Barkley 901

Preparative Separation of α- and β-Naphthols Catalyzed by Immobilized Sulfatase
G. Pelsy and A. M. Klibanov 919

Heat and Mass Transfer Effects in Static Solid-Substrate Fermentations. Design of Fermentation Chambers
B. L. Rathbun and M. L. Shuler 929

Kinetic Studies of Enzymatic Hydrolysis of Insoluble Cellulose. (II): Analysis of Extended Hydrolysis Times
Y-H. Lee and L. T. Fan 939

Confining Mycelial Growth to Porous Microbeads. A Novel Technique to Alter the Morphology of Non-Newtonian Mycelial Cultures
K. Gbewonyo and D. I. C. Wang 967

Optimization of Batch Fermentation Processes by Graphical Method
J. Staniškis and D. Levišauskas 985

Methanol Bioconversion by *Butyribacterium Methylotrophicum*—Batch Fermentation Yield and Kinetics
R. Datta and J. Ogletree 991

Production of L-Tryptophan by *Escherichia Coli* Cells
W-G. Bang, S. Lang, H. Sahm, and F. Wagner 999

Continuous Production of L-Tryptophan from Indole and L-Serine by Immobilized *Escherichia Coli* Cells
W-G. Bang, U. Behrendt, S. Lang, and F. Wagner 1013

Structure-Function Relationships in Immobilized Chymotrypsin Catalysis
D. S. Clark and J. E. Bailey 1027

A Simple, Sensitive, and Accurate Alcohol Electrode
C. Verduyn, J. P. Van Dijken, and W. A. Scheffers 1049

Arachidonic Acid Production by the Red Alga *Porphyridium cruentum*
T. J. Ahern, S. Katoh, and E. Sada 1057

Saccharification of Bamboo Carbohydrates for the Production of Ethanol
T. J. B. De Menezes, C. L. M. Dos Santos, and A. Azzini 1071

The Effect of Carbon Dioxide on the Production of an Extracellular Nuclease of *Staphylococcus aureus*
A. V. Quirk and R. W. H. Plank 1083

Immobilization of the Exo-Maltohexaohydrolase by the Irradiation Method
T. Nakakuki, T. Hayashi, M. Monma, K. Kawashima, and K. Kainuma 1095

Bioconversion of Cellulose into Ethanol by *Clostridium thermocellum*—Product Inhibition
S. Kundu, T. K. Ghose, and S. N. Mukhopadhyay 1109

Bioconversion of Hemicellulose: Aspects of Hemicellulase Production by *Trichoderma reesei* QM 9414 and Enzymic Saccharification of Hemicellulose
R. F. H. Dekker 1127

Hydrodynamics, Mass Transfer, and Yeast Culture Performance of a Column Bioreactor with Ejector
A. Prokop, P. Janík, M. Sobotka, and V. Krumphanzl 1147

COMMUNICATIONS TO THE EDITOR

A Biotechnological Approach to the Synthesis of Epoxides: Bioconversion of Hydrocarbons by *Pseudomonas oleovorans* during Growth in a Multiphase System
M. J. De Smet 1161

Sorption of *Thiobacillus ferrooxidans* to Particulate Material
A. A. Dispirito, P. R. Dugan, and O. H. Tuovinen 1163

Cellulose Hydrolysis by the Cellulases Produced by *Talaromyces emersonii* when Grown on Different Inducing Substrates
A. P. Moloney, P. J. Considine, and M. P. Coughlan 1169

The Role of Iron in Metal Sulfide Leaching by Galvanic Interaction
L. E. Murr and A. P. Mehta 1175

Alcoholic Fermentation of Raw Sweet Potato by a Nonconventional Method Using *Endomycopsis fibuligera* Glucoamylase Preparation
B. C. Saha and S. Ueda 1181

Experience with Solvent Production by *Clostridium beijerinckii* in Continuous Culture
I. M. L. Jõbses and J. A. Roels 1187

Check for Consistency of Experimental Determination of Transient Characteristics of Oxygen Probes with Significant Liquid Film Resistance
V. Linek, V. Vacek, and T. Sinkule 1195

Information for Contributors 1201

Issue No. 5, May

Introduction
G. P. Stickle and J. M. West 1203

Current Practice in Designing Bottom-Entering Fermentor Drives
J. D. Wilson and T. E. Andrews 1205

Fermentation Process Air Filtration via Cartridge Filters
C. A. Perkowski 1215

Fermentation Air Filtration Upgrading by Use of Membrane Cartridge Filters
C. F. Bruno and L. A. Szabo 1223

A Rapid Method for Detecting Bacterial Contamination in the Presence of *Penicillium* and *Strepomyces* Antibiotic Fermentations
J. McLaughlin, C. F. Bruno, and T. Forrest 1229

A Minicomputer System for Analyzing and Reporting Pilot Plant Fermentor Data
L. Bowski, C. Perley, and J. M. West 1237
(*end of Symposium*)

Toxicity of Organic Extraction Reagents to Anaerobic Bacteria
M. J. Playne and B. R. Smith 1251

Mass-Energy Balance for Microbial Product Synthesis—Biochemical and Cultural Aspects
I. G. Minkevich 1267

Analysis of Protein Distribution in Budding Yeast
L. Alberghina, L. Mariani, E. Martegani, and M. Vanoni 1295

Effect of Chemical Modification of Cellulose on the Activity of a Cellulase from *Aspergillus niger*
R. F. Boyer and M. A. Redmond 1311

Some Fluidization Characteristics of Biological Beds
S. W. Hermanowicz and J. J. Ganczarzyk 1321

Purification of Chymotrypsin by Subunit Exchange Chromotography on the Denatured Protein
G. Carrea, P. Pasta, and E. Antonini 1331

Production of Biomass and β-D-Galactosidase by *Candida pseudotropicalis* Grown in Continuous Culture on Whey

E. Sada, S. Katoh, M. Shiozawa, and I. Matsui 2285

Influence of Oxygen on the Growth of *Saccharomyces Cerevisiae* in Continuous Culture
K. Furukawa, E. Heinzle, and I. J. Dunn 2293

A Simple Algal Production System Designed to Utilize the Flashing Light Effect
E. A. Laws, K. L. Terry, J. Wickman, and M. S. Chalup 2319

Dynamics of Biodegradation of 2,4-Dichlorophenoxyacetate in the Presence of Glucose
A. C. Papanastasiou and W. J. Maier 2337

Least-Squares Estimation of Batch Culture Kinetic Parameters
S. L. Ong 2347

Rotating Drum Fermentor for Plant Cell Suspension Cultures
H. Tanaka, F. Nishijima, M. Suwa, and T. Iwamoto 2359

A New Process Combining Adsorption and Enzyme Reaction for Producing Higher-Fructose Syrup
K. Hashimoto, S. Adachi, H. Noujima, and Y. Ueda 2371

Productions of Cellulase from *Pestalotiopsis versicolor*
M. N. A. Rao, B. M. Mithal, R. N. Thakur, and K. S. M. Sastry 2395

Thienamycin Production by Immobilized Cells of *Streptomyces cattleya* in a Bubble Column
E. J. Arcuri, J. R. Nichols, T. S. Brix, V. G. Santamarina, B. C. Buckland, and S. W. Drew 2399

Stopped-Flow Kinetic Studies of the Cellulase-Catalyzed Conversion of Cellulose to Glucose
D. K. Banerjee and K. J. Laidler 2413

Competition of Two Microbial Populations for a Single Resource in a Chemostat when One of Them Exhibits Wall Attachment
B. C. Baltzis and A. G. Fredrickson 2419

Properties and Application of Immobilized β-D-Glucosidase Coentrapped with *Zymomonas Mobilis* in Calcium Alginate
J. M. Lee and J. Woodward 2441

Flouresence and Photoacoustic Spectroscopy of Immobilized Thylakoids
B. Thomasset, J.-N. Barbotin, D. Thomas, T. Thomasset, A. Vejux, and J. Jeanfils 2453

Communications to the Editor

Estimation of Biomass Concentration in the Presence of Solids for the Purpose of Parameter Estimation
B. O. Solomon, L. E. Erickson, and S. S. Yang 2469

Intrinsic, Inherent, and Observed Kinetic Data with Immobilized Enzymes: The Concept of Rotational Masking
I. A. Webster 2479

Flow Cytometric Analysis of Plasmid Heterogeneity in *Escherichia coli* Populations
K. Dennis, F. Srienc, and J. E. Bailey 2485

Issue No. 11, November

A New Function for Overall Optimization of Yeast Production
M. M. Klibansky, M. A. Otero, and L. F. Gonzalez 2493

Automatic On-Line Fermentation Headspace Gas Analysis Using a Computer-Controlled Gas Chromatograph
D. M. Comberbach and J. D. Bu'lock 2503

The Macrokinetics of an Enzymatic System Containing an Enzyme that Inactivates in the Course of Reaction
G. F. Sud'Ina, G. M. Kobel'kov, and S. D. Varfolomeev 2519

Mathematical Description of Anaerobic Treatment of Wastewater in Upflow Reactors
R. R. Van Der Meer and P. M. Heertjes 2531

Enzyme Electrode for Specific Determination of L-Lysine
J. L. Romette, J. S. Yang, H. Kusakabe, and D. Thomas 2557

Bacterial Fermentation of Cellulose: Effect of Physical and Chemical Parameters
D. W. Armstrong and S. M. Martin 2567

Catalytic Solvent Delignification of Agricultural Residues: Organic Catalysts
T. K. Ghose, P. V. Pannir Selvam, and P. Ghosh 2577

A Kinetic Model for the Activated Sludge Process which Considers Diffusion and Reaction in the Microbial Floc
L. Benefield and F. Molz 2591

Enzyme Immobilization on Palmityl-Sepharose
M. Nemat-Gorgani and K. Karimian 2617

Effect of Gamma-Ray Irradiation on Alcohol Production from Corn
Y. W. Han, Y. K. Cho, and A. Ciegler 2631

Two-Stage Continuous Fermentation of *Saccharomycopsis fibuligera* and *Candida utilis*
W. Admassu, R. Korus, and R. Heimsch 2641

Hollow-Fiber Membrane Bioreactors Using Immobilized *E. Coli* for Protein Synthesis
D. S. Inoles, W. J. Smith, D. P. Taylor, S. N. Cohen, A. S. Michaels, and C. R. Robertson 2653

Utilization of Statistics and Experimental Design in Data Collection and Analysis
B. O. Solomon, L. E. Erickson, and S. S. Yang 2683

Kinetic Studies of Enzymatic Hydrolysis of Insoluble Cellulose: Derivation of a Mechanistic Kinetic Model
L. T. Fan and Y.-H. Lee 2707

Cultural Properties and Mass-Energy Balances in Methanol Fermentation by *Methylomonas methanolovorans*
Y. Amano, N. Takada, H. Sawada, H. Sakuma, and G. Terui 2735

Production of Sugars from Wood Using High-Pressure Hydrogen Chloride
R. A. Antonoplis, H. W. Blanch, R. P. Freitas, A. F. Sciamanna, and C. R. Wilke 2757

Communications to the Editor

On the Criticism of "Some Measurements of Photosynthetic Efficiency"
S. Aiba and T. Ogawa 2775

Immobilization of Papain with Acrolein-Styrene Copolymers Containing Carbonyl Groups
L. Tarhan and B. Pekin 2777

On the Relation of Temperature and RNA Content to the Specific Growth Rate in *Saccharomyces cervisiae*
G. Parada and F. Acevedo 2785

Detection of Reactor Nonhomogeneities by Measuring Culture Flouresence
K. Gschwend, W. Beyeler, and A. Fiechter 2789

Sodium Cyanoborohydride in the Immobilization of Proteins to Glutaraldehyde-Activated Aminoalkyl Silica
A. W. Miller and J. F. Robyt 2795

Issue No. 12, December

Bioengineering Report: Theory and Applications of Unstructured Growth Models: Kinetic and Energetic Aspects
A. A. Esener, J. A. Roels, and N. W. F. Kossen 2803

Conversion of Organic Acids to H_2 by *Rhodospirillaceae* Grown with Glutamate or Dinitrogen as Nitrogen Source
L. Segers and W. Verstraete 2843

Effect of Glucose and Other Sugars on the β-1,4-Glucosidase Activity of *Thermomonospora fusca*
J. D. Ferchak and E. K. Pye 2855

Effect of Cellobiose, Glucose, Ethanol, and Metal Ions on the Cellulase Enzyme Complex of *Thermomonspora fusca*
J. D. Ferchak and E. K. Pye 2865

Enhancing Gas-Liquid Mass Transfer Rates in Non-Newtonian Fermentations by Confining Mycelial Growth to Microbeads in a Bubble Column
K. Gbewonyo and D. I. C. Wang 2873

The Ejector-Loop Fermenter: Description and Performance of the Apparatus
M. Moresi, G. B. Gianturco, and E. Sebastiani 2889

Substrate-to-Biomass Ratio as a Process Control Parameter in Heterogeneous Populations Growing on Complex Substrates
A. J. McLoughlin and M. B. Crombie-Quilty 2905

Reaction Characteristics of an Immobilized Yeast Producing Ethanol
S. Furusaki, M. Seki, and K. Fukumura 2921

Mode of Uptake of Insoluble Solid Substrates by Microorganisms. I: Sterol Uptake by an Arthrobacter Species
P. C. Goswami, H. D. Singh, S. D. Bhagat, and J. N. Baruah 2929

Mode of Uptake of Insoluble Solid Substrates by Microorganisms. II: Uptake of Solid n-Alkanes by Yeast and Bacterial Species 2945

Preparation of Immobilized α-Amylase Covalently Attached to Granular Polyacrylonitrile
T. Handa, A. Hirose, T. Akino, K. Watanabe, and H. Tsuchiya 2957

Factors Effecting Cell Attachment, Spreading, and Growth on Derivatized Microcarriers: II. Introduction of Hydrophobic Elements
S. Reuveny, A. Mizrahi, M. Kotler, and A. Freeman 2969

The Continuously Fed Batch Reactor for Measuring Microbial Growth Rates
I. A. Webster 2981

Effects of Temperature Shift on Growth Rate of *Escherichia coli* BB at Lower Glucose Concentration
T. Chohji, T. Sawada, and S. Kuno 2991

Development of a Culture Medium for Large-Scale Production of Cellulolytic Enzymes by *Trichoderma reesei*
M. Warzywoda, V. Ferre, and J. Pourquie 3005

Determination of Inorganic Phosphorus Using Immobilized Pyruvate Oxidase
M. Tabata and T. Murachi 3013

Enzymatic Saccharification of Sugarcane Bagasse Pretreated by Autohydrolysis—Steam Explosion
R. F. H. Dekker and A. F. A. Wallis 3027

Isoelectric Precipitation of Soy Protein: I. Factors Affecting Particle Size Distribution
A. M. Pentenate and C. E. Glatz 3049

Isoelectric Precipitation of Soy Protein. II. Kinetics of Protein Aggregate Growth and Breakage
A. M. Pentenate and C. E. Glatz 3059

A Generalized Kinetic Model for the Study of Microbial Growth
H. Hiss and W. Borzani 3079

Kinetics of Organic Compound Removal from Waste Gases with a Biological Filter
S. P. P. Ottengraf and A. H. C. Van Den Oever 3089

Adsorption of Cellulase from *Trichoderma viride* on Cellulose
H. Ooshima, M. Sakata, and Y. Harano 3103

Mixing and Oxygen Transfer in Conventional Stirred Fermentors
R. Manfredini, V. Cavallera, L. Marini, and G. Donati 3115

Intensive Use of Biomass Feedstock in Ethanol Conversion: The Alcohol–Water Vapor-Phase Separation
G. H. Robertson, L. R. Doyle, and A. E. Pavlath 3133

Explosive Pretreatment of Lignocellulosic Residues with High-Pressure Carbon Dioxide for the Production of Fermentation Substrates
V. P. Puri and H. Mamers 3149

Biological Oxidation of Organic Constituents in Tar–Sand Combustion-Process Water
M. F. Torpy, R. G. Luthy, and L. A. Raphaelian 3163

Communications to the Editor

Immobilization of Oxyreductases on Inorganic Supports Based on Alumina—Immobilization of Alcohol Dehydrogenase on Nonmodified and Modified Alumina
G. A. Kovalenko and V. D. Sokolovski 3177

Maximizing the Formation of Glucose in the Enzymatic Hydrolysis of Insoluble Cellulose
J. A. Asenjo 3185

Activity and Stability of Glucose Oxidase and Invertase Immobilized on Concanavalin A Sepharose: Influence of Lectin Concentrations
J. Iqbal and M. Saleemuddin 3191

Protease and Amylase Activities of *Aspergillus flavus* Grown on Hydrocarbons and Oxygenated Hydrocarbons
M. Magdel-Din Hussein and E. M. Abdel-Gawad 3197

Catalytic Properties of Immobilized and Pure Glucoamylase from *Aspergillus niger C.*
J. Łobarzewski and A. Paszczyński 3207
